

Partable Makes Aftermarket Parts Search as Easy as Search, Select, Buy

CDS Partable is an approved add-on for B2B Commerce Solutions that enables an integrated spare part search which streamlines identifying, selecting and ordering of parts for industrial machinery and mobile equipment.

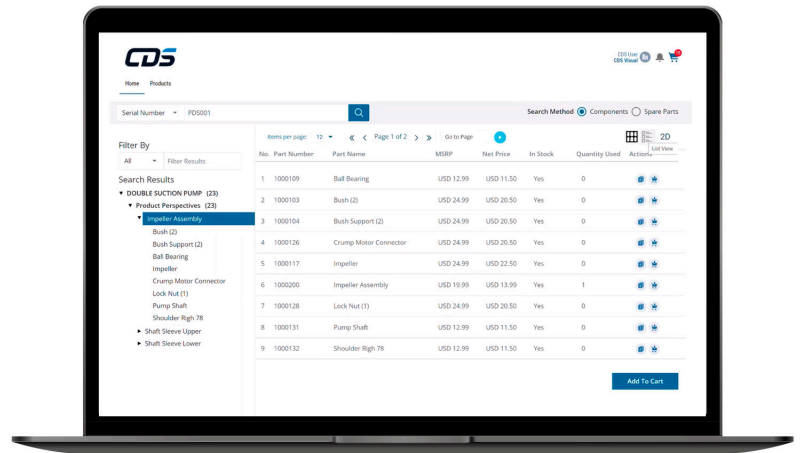

Search🔍

Partable delivers a high performance interactive visual search that enables users to select their product's unique serial number, view their respective BOM (bill of materials), quickly identify, select, and add parts to their cart. It enhances B2B Commerce Solutions platform spare part identification and selection process with 2D exploded drawings with hotspots. In addition to 2D search CDS Partable delivers an unmatched interactive 3D model search that allows users to explode, rotate, and zoom products in 3D. Built specifically for non-technical users who need to quickly select and identify the right replacement part.

Partable makes it easy when parts are needed for complex products. Customers can quickly identify sub-components and specific parts, or replacement parts and components for "made-to-order" complex equipment where the unique BOM items are defined during the sales process.

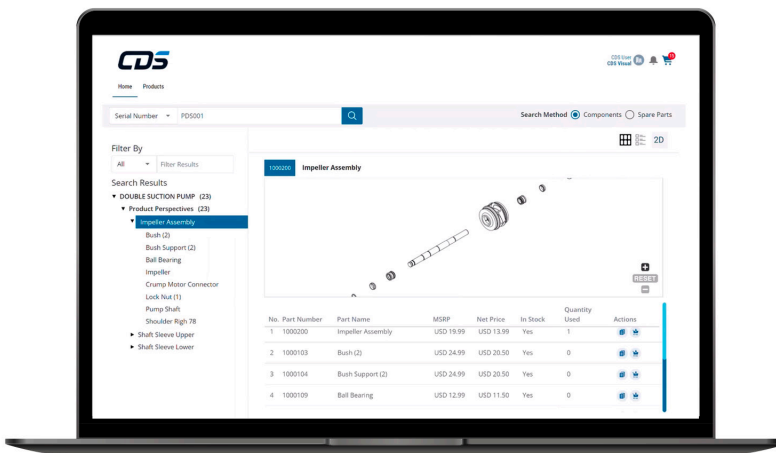

BOM Search

- Specialized searches such as Serial Number, Product Version, etc. are redirected from eCommerce search to specialized Partable search
- Order based search (for cases where the company does not use Serial Numbers to identify specific instances of equipment's sold to customers)
- Product/vendor part number search
- BOM based navigation for list/card view
- Visualization and product navigation facilitators

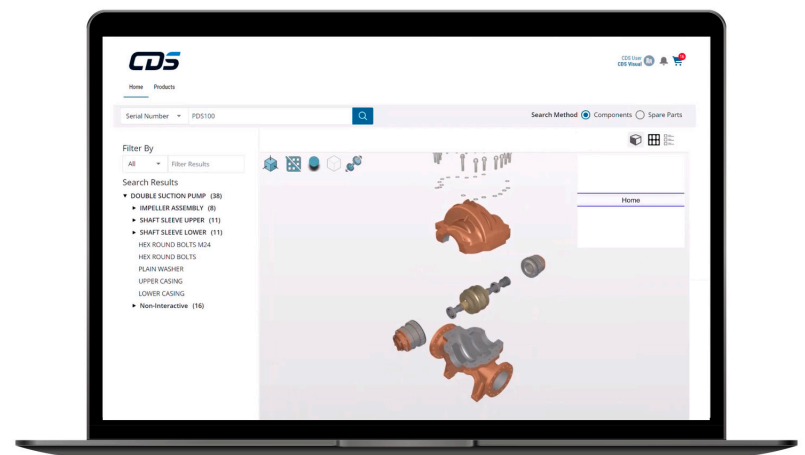

2D Visual Search

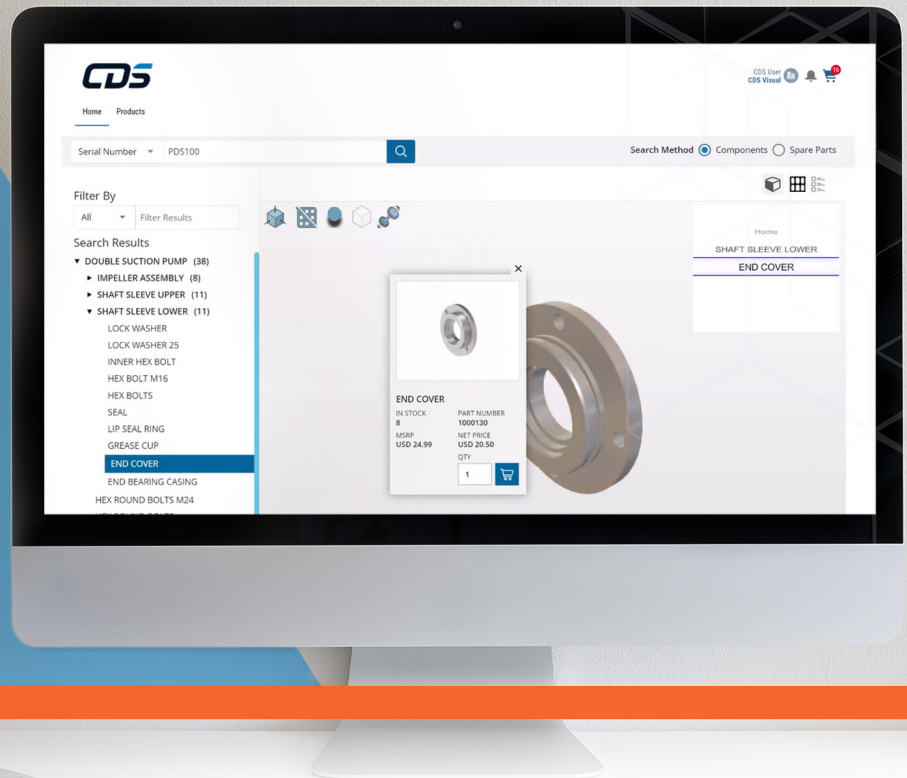

- Exploded view product images with hotspots
- Serial number specific part number search
- BOM navigation through image hotspots
- Selection of a complete sub assembly vs parts within a subassembly
- Present associated technical documentation and product manuals
- Suppression of selectable part numbers based on eCommerce logic
- Supporting data
- 2D image asset mapping to part number

3D Visual Search

- Interactive 3D with part selection
- Serial number specific part numbers
- Serial numbers the ability to hide/show/selection of 3D parts
- BOM navigation for 3D models
- Assembly-subassembly-part relationships
- Selection of a complete sub assembly vs parts within a subassembly
- Product manuals and technical documentation
- Suppression Functionality

Select

Partable search is designed for both novice and experienced users who need to accurately identify and select part numbers to quickly and easily add aftermarket spare parts to the eCommerce shopping cart.

Customers, dealers, distributors, and technicians are often familiar with the machine that needs to be repaired and are able to identify broken parts. With the broken part in hand, customers save valuable time identifying and selecting the part they need with Partable's efficient search and selection capabilities.

Partable makes it easy when parts are needed for complex products. Customers can quickly identify sub-components and specific parts, or replacement parts and components for "made-to-order" complex equipment where the unique BOM items are defined during the sales process.

Buy

Once a part is identified, it only takes one click to add it to the shopping cart. Any number of parts can be added to a single cart to build a complete order in minutes. The customer gets a complete purchase list and confirmation, and you get a complete order that you can easily and efficiently build and fulfill, reducing your costs and increasing your profits.

Features

- Partable integrates with B2B Commerce Solutions*
- API based integration for callback operations to eCommerce platform
- Integration APIs for data transfer with customer back-office systems
- Authoring: Supports the creation of interactive content for 2D & 3D visualization modes with eCommerce part number mapping and BOM associativity.
- Streamlined operation with simple setup and management of your aftermarket part search data.

SaaS Subscription

- Subscription license, 3-year agreement with 5 administrator licenses and unlimited end users
- No eCommerce transaction fee
- Includes level 1 and level 2 technical support 24 x 5
